

MB7-A06**Admin account can be blocked by its owner.****Status:** In progress**Priority:** High**Issue Type:** Permissions**Frequency:** 100%**Linked to:** MB7-C63**Product Version:** MrBuggy 7 version 1.0.0.1**Environment:** Windows 10 Pro, i7-4712MQ, 8GB RAM**Author:** Jan Kowalski**Assignee:** Adam Nowak**Date:** 17.08.2022, 12:25**Actions performed:**

1. Enter authorisation credentials of admin level.
2. Create PUT /user/ID/block request using your own account's ID.
3. Send the request and attempt to perform any further actions across API.

Expected result:

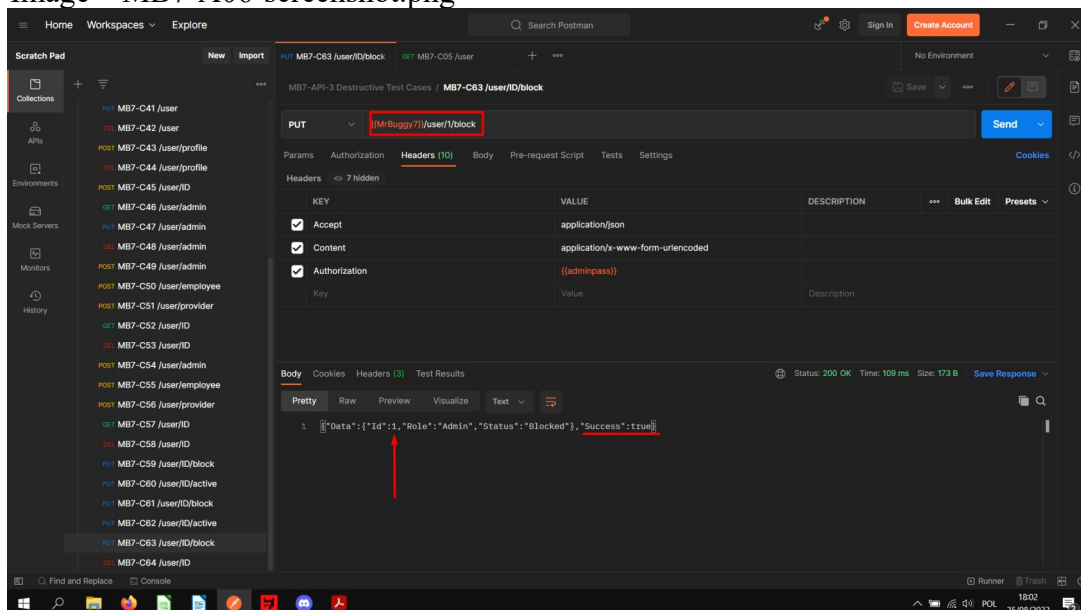

Admin should not be able to block his/hers own account.

Actual result:

Admin can block his/hers own account, preventing further access to the application. Issue is especially dangerous in the scenario that there are no other admin-levelled accounts who can unblock the original account.
