

Mr Buggy 7 – Exploratory Testing TEST REPORT

Tester: Jan Kowalski

Test charter: exploration testing around key functionalities and user/account system

Total estimated time: 8h (2x 4h sessions over 2 days)

Preparation: 1h

Exploratory testing: 4h

Reporting: 3h

Summary:

I have focused my testing on two key areas of the application, as stated in the test charter. Account system has been checked in terms of overall UI/UX quality. Access levels were also tested, to highlight any issues with possible data leaks and other illegal operations. Then I have moved to the CR workflow testing, trying to replicate the natural usage of the application by end users. Issue MB7-E20 blocked further attempts of testing main CR workflow – 3 final states were not tested.

Tested/ Untested areas:

Tested	Untested
<ul style="list-style-type: none">• Main CR workflow• Screens (UI/UX)• Account system• Log-in/Registration system• Access levels	<ul style="list-style-type: none">• Automatic archiving management• Dashboard counters• Final steps of CR workflow• Export of CRs

Reported issues (by priority):

Priority	Amount	ID
Critical	1	MB7-E20
High	5	MB7-E04, MB7-E05, MB7-E08, MB7-E15, MB7-E18
Medium	7	MB7-E03, MB7-E06, MB7-E12, MB7-E13, MB7-E14, MB7-E17, MB7-E19
Low	7	MB7-E01, MB7-E02, MB7-E07, MB7-E09, MB7-E10, MB7-E11, MB7-E16
Total:	20	

Reported issues (by type):

Type	Amount	ID
Functional	13	MB7-E02, MB7-E05, MB7-E06, MB7-E08, MB7-E09, MB7-E10, MB7-E11, MB7-E13, MB7-E14, MB7-E15, MB7-E17, MB7-E18, MB7-E20
Security	2	MB7-E03, MB7-E04
Content	1	MB7-E19
