| MB7-E03	**Password validation is inconsistent with the specification document.**

Status: In progress

Priority: Medium

Issue Type: Security

Frequency: 100%

Author: Jan Kowalski

Assignee: Adam Nowak

Date: 01.08.2022, 12:45

Product Version: MrBuggy 7 version 1.0.0.1

Environment: Windows 10 Pro, i7-4712MQ, 8GB RAM

Actions performed:

1. Create any type of account.
2. Input the password with the following attributes:
- 4 lowercase characters
- 1 special character
- 1 number
3. Fill up the rest of the form with valid data and submit the request.

Expected result:

Password validation requires minimum of 8 digits, with at least 1 capital letter, 1 number and 1 special character, as per application specification document.

Actual result:

Application will accept 6-digit password without a capital letter.
